```

Run the main loop

root.mainloop()

Output:

The image shows two overlapping windows from a GUI application. The background window, titled "GUI Widgets Example", contains a form with the following elements:

- A text input field labeled "Enter Your Name:" containing the text "Qayam".
- A section labeled "Select Gender:" with three radio button options: "Male" (selected), "Female", and "Other".
- A section labeled "Select Interests:" with three checkbox options: "Reading", "Music", and "Sports" (checked).
- A "Submit" button at the bottom.

The foreground window, titled "Form Submitted", displays the submitted data:

- A blue information icon (i) on the left.
- Text on the right: "Name: Qayam", "Gender: Male", and "Selected Options: Sports".
- An "OK" button at the bottom right.
